

Journal of Forest Planning

Publication Ethics and Malpractice Statement

Basic Information

Full title: Journal of Forest Planning

Online ISSN: 2189-8316

Publishing schedule: yearly in April

Abbreviated title: J. For. Plann.

Print ISSN: 1341-562X

Web site: <https://www.forestplanning.jp/jfp/>

Editorial Board

Satoshi Tatsuhara Editor-in-Chief

The University of Tokyo, Japan

Pete Bettinger

University of Georgia, USA

Paolo Cherubini

Swiss Federal Institute for Forest, Snow and Landscape Research, Switzerland

Shongming Huang

Ministry of Agriculture and Forestry, Government of Alberta, Canada

Rodney Keenan

The University of Melbourne, Australia

Hiroshi Kondoh

Forestry and Forest Products Research Institute, Japan

Masashi Konoshima

University of the Ryukyus, Japan

Jungsoo Lee

Kangwon National University, Korea

Chinsu Lin

National Chiayi University, Taiwan

Tohru Nakajima Managing Editor

The University of Tokyo, Japan

Nophea Sasaki

Asian Institute of Technology, Thailand

Satoshi Tachibana

University of Tsukuba, Japan

Hayato Tsuzuki

University of Ehime, Japan

Guangyu Wang

University of British Columbia, Canada

Shourong Wu

Beijing Forestry University, China

Editorial Office

Dr. Satoshi Tatsuhara

Fees for Authors

Expense on Publication: No charges will be levied for papers published in the Journal. However, authors who need color page/special printing will be required to pay the actual expenses involved. Reprints can also be ordered in blocks of 50 copies at the actual expenses involved. All prices are subject to change.

Duties of Authors

Reporting standards: Authors should report their methods and findings accurately. Authors should provide sufficient detail to permit other researchers to repeat the work. Authors should present their results honestly and without fabrication, falsification, or inappropriate data manipulation.

Data access and retention: Authors may be asked to disclose the research data for the review process. Authors should maintain the primary data and analytic procedures underpinning the published results for at least 10 years after publication.

Authorship of the paper: The award of authorship should balance intellectual contributions to the conception, design, analysis, and writing of the study against the collection of data and other routine work. If there is no task that can reasonably be attributed to a particular individual, then that individual should not be credited with authorship.

Authorship should be based on the following criteria: (1) Substantial contributions to the conception or

design of the work; or the acquisition, analysis, or interpretation of data used for the work; (2) Drafting the work or revising it critically for important intellectual content; (3) Final approval of the version to be published; (4) Agreement to be accountable for all aspects of the work in ensuring that questions related to the accuracy or integrity of any part of the work are appropriately investigated and resolved.

Contributors who meet fewer than all four of the above criteria for authorship should not be listed as authors, but they should be acknowledged. Those whose contributions do not justify authorship may be acknowledged individually or together as a group under a single heading, and their contributions should be specified.

Conflict of interest: Authors should disclose to editors relevant financial and non-financial interests and relationships that might be considered likely to affect the interpretation of their findings. All sources of research funding, including direct and indirect financial support, the supply of equipment or materials, and other support should be disclosed as well.

Originality and plagiarism: Authors should adhere to publication requirements that submitted work be original. Authors should represent the work of others accurately in citations and quotations. Relevant previous work and publications, both by other researchers and the authors' own, should be properly acknowledged and referenced. Data, text, figures, or ideas originated by other researchers should be properly acknowledged and should not be presented as if they were the authors' own.

Redundant publication: Authors should not submit the same manuscript, in the same or different languages, simultaneously to more than one journal. Previous publication of an abstract in the proceedings of meetings does not preclude subsequent submission for publication.

Adherence to peer review: Authors should respond to reviewers' comments in a professional and timely manner. Authors should inform the editor if they withdraw their work from review, or choose not to respond to reviewer comments after receiving a conditional acceptance.

Corrections: Authors should alert the editor promptly if they discover an error in any submitted, accepted, or published work. Authors should cooperate with the editors in issuing corrections or retractions when required.

Review Process

The Journal conducts a single-blind review process. Each manuscript is first handled by one of the editors, at which time it is evaluated for Journal suitability. Manuscripts considered to be suitable are then peer-reviewed by at least two anonymous expert referees selected by the editor.

The editorial board makes the final decision to accept, reject, or suggest revision to manuscripts based on its contribution in terms of original data and ideas as indicated by the results of reviews conducted by the referees.

Duties of Reviewers

Contribution to editorial decisions: Reviewers are experts chosen by editors to provide written opinions. Peer review helps editors decide which manuscripts are suitable for the Journal. It also helps authors improve their study.

Promptness: Reviewers are expected to respond promptly to requests to review and to submit reviews within the time agreed.

Standards of objectivity: Reviewers should provide unbiased and justifiable reports. Reviewers' comments should be constructive, honest, and polite.

Confidentiality: Reviewers should keep manuscripts and the information they contain strictly confidential. Reviewers should not publicly discuss the authors' work and should not appropriate the authors' ideas before the manuscript is published. Reviewers should not retain the manuscript for their personal use and should destroy the copies of any manuscripts they have been provided after submitting their reviews. Reviewers should not use knowledge of the work they are reviewing before its publication to further their own interests.

Conflict of interest: Reviewers should disclose to the editors any conflicts of interest that could bias their opinions of the manuscript, and should recuse themselves from reviewing specific manuscripts if the potential for bias exists.

Ethical issues: If reviewers suspect the authors' misconduct, they should notify the editor in confidence.

Duties of Editors

Publication decision: The editors' decisions to accept or reject a manuscript for publication should be based on the manuscript's importance, originality, and clarity, as well as the study's validity and its relevance to the scope of the Journal.

Confidentiality: Editors should treat all submitted manuscripts as confidential. Editors should not share information about manuscripts, including whether they have been received and/or are under review, their content and status in the review process, criticism by reviewers, and their ultimate fate, to anyone other than the authors and reviewers. Editors should also make it clear that reviewers will be expected to keep manuscripts, associated material, and the information they contain strictly confidential.

Conflict of interest: Editors who make final decisions about manuscripts should recuse themselves from editorial decisions if they have conflicts of interest or relationships that pose potential conflicts related to manuscripts under consideration. If an editor submits a manuscript to the Journal, another editor will handle the peer-review process of the manuscript independently of the authoring editor.

Corrections: When a published paper is subsequently found to contain flaws or errors, editors should accept responsibility for correcting the record prominently and promptly. In this case, editors should consider retracting a paper, issuing an erratum, or issuing an expression of concern in line with [COPE's Retraction Guidelines](#).

Copyright

Copyright: The Society reserves all rights to the papers published by the Journal. Written permission by the editor-in-chief is required for the reproduction or republication of Journal-published manuscripts, either in whole or in part.

Rights of Authors: The authors retain the following rights:

- (1) Authors are allowed to reproduce their own Journal-published papers, either in whole or in part, in their own literary works providing they acknowledge the Journal as its source.
- (2) Authors are allowed to provide a PDF file of their paper to the public at repositories of their affiliations and financial contributors after it has been provided to the public via J-STAGE on the condition that they display a link to the paper's abstract on the J-STAGE website.
- (3) Authors are allowed to electronically copy and distribute a PDF file of their paper on the condition that they purchase reprints of their paper, or the PDF file of their paper at the same price as the reprints of their paper. In this case, authors are allowed to post the PDF file on their personal website after providing it to the public via J-STAGE and should display a link to the paper's abstract on the J-STAGE website.

Notice about Photocopying: In order to photocopy any work from this publication, you or your organization must obtain permission from the following organization which has been delegated for copyright clearance by the copyright owner of this publication.
